**MATH/NUMBER AWARENESS**

**Creating bar graphs:** Have your child count each set of items in the box and complete the bar graph by coloring in that number of squares. Ask him to use the words “more” and “less” to compare.

---

**Tip for parents:** Say aloud two numbers (such as 6 and 12) and have your child say which number is bigger. Then suggest two different numbers and have your child say which number is smaller.

Why keep the fun all to yourself? Please feel free to share this worksheet with friends.
